## **'MATC' Series Water Softeners**

#### **Overview**

The Marlo 'MATC' water softener system is a meter initiated twin-alternating softener that offers the commercial or institutional facility a robust and efficient solution for reducing mineral scale, soap usage, and energy consumption in their plumbing and other water-using equipment.

The twin-alternating design provides a continuous supply of softened water for critical applications, such as boiler feed, with a fully recharged tank always in standby.

### **Standard Features**

- Top mounted, twin tank control valve
- NSF certified corrosion resistant fiberglass tanks
- Piston actuated, multiport, plastic or brass control valves
- Water meter initiated regeneration cycle
- Brine tank assembly with safety overflow
- High capacity sodium form cation exchange resin
- Water hardness testing kit

#### **Materials of Construction**

Control Valve Body:

1" Noryl Plastic

- Resin Tanks: Fiberglass reinforced polyethylene NSF 44 certified
- Internal Distributors: Sch 80 PVC/ABS
- Brine Tank: Corrosion resistant polyethylene
- Meter: Internal

#### Instrumentation / Controls

• Metered -

LCD Display Screen

On board diagnostics and error reporting Flow totalizer

#### **Operating Parameters**

- Inlet Pressure: 25-125 psig
- Electrical: 12V circuitry
- 120/12 VAC, 50/60 Hz wall mount transformer
- Temperature: 40-110 °F

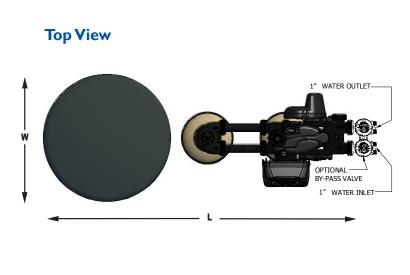

#### **Options Available**

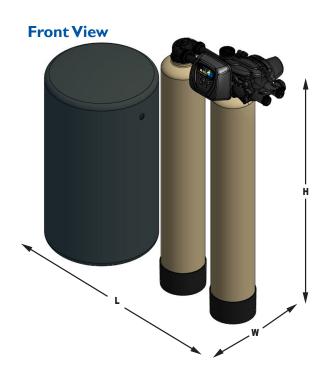

- Skid mounted, pre-piped, pre-loaded systems
- Bypass valve
- Inlet/Outlet pressure gauges and sample valves
- Larger brine tanks
- Multiple voltage options
- Application specific resin

## **Specifications**

## **'MATC' Series Dimensions**

## Notes

- Maximum capacity based on 30,000 grains per cubic foot of resin when regenerated with 15 lbs. salt . Minimum capacity based on 20,000 grains per cubic foot of resin when regenerated with 6 lbs. salt.
- 2 At pressure loss not exceeding 15 psi.
- 3 At pressure loss not exceeding 25 psi.
- Dimensions are estimate only. Actual dimensions may vary based on job-site space limits and piping layout. Allow a minimum of 24" above height dimension for resin loading.
- **6** Shipping weights are estimate only. Weights include resin and support gravel, which are added to the tanks after installation.
